IC2002	ACCRD1	N	2	National or specialized accrediting	This institution is accredited by the following accrediting agency(ies). [Check all that apply]
					National institutional or specialized accrediting agency
					ACCREDITING AGENCIES - Agencies that establish operating standards for educational or professional institutions and programs, determine the extent to which the standards are met, and publicly announce their findings
					NATIONAL INSTITUTIONAL ACCREDITATION - Institutional accreditation normally applies to an entire institution, indicating that each of its parts is contributing to the achievement of an institution's objectives, although not necessarily all on the same level of quality. The various commissions of the regional accrediting associations, for example, perform institutional accreditation, as do some national institutional accrediting agencies.
					SPECIALIZED ACCREDITATION - Specialized accreditation normally applies to the evaluation of programs, departments, or schools which usually are parts of a total collegiate or other postsecondary institution. The unit accredited may be as large as a college or school within a university or as small as a curriculum within a discipline. Most of the specialized accrediting agencies review units within a postsecondary institution which is accredited by one of the regional accrediting commissions. However, certain of the specialized accrediting agencies accredit professional schools and other specialized or vocational or other postsecondary institutions which are free-standing in their operations. Thus, a "specialized" or "programmatic" accrediting agency may also function in the capacity of an "institutional" accrediting agency. In addition, a number of specialized accrediting agencies accredit educational programs within non-educational settings, such as hospitals.

IC2002	CALSYS	N	2	Calendar system	hat is the predominant calendar system at the institution? [Choose one]

Standard academic terms Checking one of these systems determines that your institution will provide graduation rates data based on a FALL COHORT and student charges based on a FULL ACADEMIC YEAR

    Semester
    Quarter
    Trimester
    4-1-4 or similar plan
    Other academic calendar

Other calendar systems (for primarily occupational schools) Checking one of the following determines that your institution will provide graduation rates data based on a FULL YEAR COHORT and student charges data will be requested by PROGRAM.

    Differs by program
    Continuous basis (every 2 weeks, monthly, or other period)

SEMESTER CALENDAR SYSTEM -A calendar system that consists of two semesters during the academic year with about 16 weeks for each semester of instruction. There may be an additional summer session.
QUARTER CALENDAR SYSTEM - A calendar system in which the academic year consists of 3 sessions called quarters of about 12 weeks each. The range may be from 10 to 15 weeks. There may be an additional quarter in the summer
TRIMESTER CALENDAR SYSTEM - An academic year consisting of 3 terms of about 15 weeks each.
FOUR-ONE-FOUR PLAN - The 4-1-4 calendar consists of 4 courses taken for 4 months, 1 course taken for 1 month, and 4 courses taken for 4 months. There may be an additional summer session.
OTHER ACADEMIC CALENDAR SYSTEM -
Category used to describe "non-traditional" calendar systems at 4-year and 2-year degree-granting institutions. These can include schools that offer primarily on-line courses or "one course at a time".
DIFFERS BY PROGRAM (CALENDAR SYSTEM) - A calendar system classification that is used by institutions that have occupational/vocational programs of varying lengths. These schools may enroll students at specific times depending on the program desired. For example, a school might offer a 2-month program in January, March, May, September, and November; and a 3-month program in January, April, and October.
CONTINUOUS BASIS (FOR PROGRAM ENROLLMENT) -A calendar system classification that is used by institutions that enroll students at any time during the academic year. For example, a cosmetology school or a word processing school might allow students to enroll and begin

HD2002	IMP_C	N	2	Imputation method used when institution did not report completions data	Type of imputation method used to impute data when institution did not respond to the Completions survey. For a complete description of the imputation procedures refer to the methodology section in the publication: http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2004154. The following is a brief description of the imputations methods used: Carry Forward - Reported 2000-2001 (or 1999-2000) completions data, including race/ethnicity and CIP, were carried foreward to the current year. The number of awards reported in 2000-2001 (or 1999-2000) was used as the base value for imputation. This base values was then multiplied by the ratio of the current year mean completions to past year mean completions within the imputation group to adjust for year-to-year change. Nearest Neighbor - The fall enrollment data for 2001 (or 2000) were used in defining the distance measure for this method. In particular, the distance between two institutions was defined as the maximum relative difference in fall enrollment among the levels of study (undergraduate, graduate, first-professional). The nearest neighbor, also referred to as the donor, of the imputee was selected from the responding institutions in the same imputation group as the donor. The doner's completions count was multiplied by the ratio of the imputee's fall enrollment to the donor's fall enrollment to adjust for the difference between the two institutions. These adjusted values were used as the imputed values. Group Median - Within the same imputation group as the imputee, if there were at least three responding institutions offering all the award levels offered by the imputee, then the median values of these institutions were used as the imputed values. Otherwise, the award level was imputed by the median values of all responding institutions in the imputation group. Imputation groups were formed primarily based on institutional sector and levels of offerings. For total nonrespondents, if there were past completions data then Carry Foreward method was used. Alternatively, if there were past enrollment data, the Nearest Neighbor method was used. Otherwise Group Median was used.
